Site Visits:

Rold S.p.a.

Via della Merlata 1, Nerviano (Milan) www.rolld.com

Contact person: Paolo Sbuttoni, tel +39 0331 438012

Leader in the manufacture of components for household appliances, ROLD has been an international point of reference. Although characterised by a typically familiar managerial structure, the company was able to introduce management criteria and high level technologies in its organisation, constantly adapting its standards to those of the best international companies. In over 50 years of production, ROLD has been able to globally confirm and consolidate the concept of quality and reliability of its products.

Rold has developed *Rold Smartfab*, an “Access Point for Industry 4.0”: it is a platform able to connect human, machine, and information, in order to make this integration easier and accelerate the adoption of cutting-edge technologies to create new and much more competitive products.

Goglio S.p.a.

Via Dell' Industria, Daverio (VA) www.goglio.it

Contact person: Marco Crippa, Mob. +39 335 7119979

Founded in Milan in 1850, thanks to the use of Industry 4.0 principles and technologies, Goglio has become leader in flexible packaging, rigid plastic accessories such as valves and spouts, and packaging machines. Their lines include form, fill and seal machines for modified atmosphere and vacuum packaging. The range of Goglio's packaging solutions for food involves various production segments: coffee, tuna fish, tomato sauce, catering, hot filled bags etc.

ComoNext

Via Cavour 2, Lomazzo (Como) www.comonext.it

Contact person: Antonio Spagnolo, mob.+39 349 7990472

Inaugurated in 2010, ComoNEXt Science and Technology Park is a project launched by the Como Chamber of Commerce to promote the growth and competitiveness of local businesses through a culture of innovation.

The Park is home to innovative startups, spinoffs, R&D companies or departments operating in various industrial sectors, and advanced technology and service providers.

ComoNEXt foster the development of new enterprises through the business incubator. The park supports the creation and the growth of innovative companies offering specialized management consulting and favorable technical and logistical solutions.
