

World Manufacturing Forum

# WMF

## - OUR VISION -

The World Manufacturing Forum is an open platform that aims to enhance and spread industrial culture worldwide, as a means to ensure economic equity and sustainable development.

### MISSION

- supporting and influencing national and international industrial agendas in a constructive manner
- providing a framework and structure for top-level companies, government agencies, academic institutions and social organizations to meet and exchange opinions
- acting as a catalyst for finding innovative solutions to major global challenges and initiatives
- disseminating knowledge to the world through international and regional meetings, publications, and ad hoc committees.

#### • Publications

A yearly Report that addresses relevant manufacturing sector issues and outlines the most significant trends, requirements and policies.

### ACTIVITIES

#### • Annual Meeting

A prestigious invitation-only event where global policy experts, industrial leaders and eminent academic and research innovators may address and discuss the challenges and trends in global manufacturing.

#### • Regional Events

Coordinating the organization and promotion of national and international events in the manufacturing industry.

## World Manufacturing Forum Annual Meeting Cernobbio, Italy 27-28 September 2018

### Manufacturing Revolution to Promote Global Resilience

How the Industrial Transformation Inspires Education,  
Sustainable Development and Societal Impact

The World Manufacturing Forum is an open platform that aims to create and encourage innovative industrial culture worldwide in order to promote **economic prosperity, sustainable development and the positive social outcomes it generates.**

The annual meeting of the World Manufacturing Forum, a highly successful by-invitation-only event, will be held in **Cernobbio, Italy on 27-28 September 2018.**

**Registration is complimentary** to our invited guests thanks to the supporting action funded by the European Commission, Regione Lombardia and Confindustria Lombardia.

During the forthcoming edition of the WMF global conference, we intend to explore how industry is responding to the challenges of the industrial revolution and technological evolution and the skills that the new workforce must acquire in order to meet the **Goals of the 2030** global industrial agenda.

Invited participants will have the opportunity to hear how visionary industrial policy will support advanced manufacturing requirements from varied social perspectives such as **Italy, France, Germany, UK, USA, Canada, South Africa, China and others.**

Furthermore, the Forum will encourage the discussion with the participation of high-level speakers from international companies.

Registration opening soon, stay tuned on our website
