INDUSTRY AT A GLANCE

Breakdown of EU production by sub-sectors

The EU Textile and Clothing sector in 2017

(Digital) Innovation, Skills, Creativity & Internationalisation will propel this industry to new heights in Europe

OBJECTIVES

Why RegioTex?

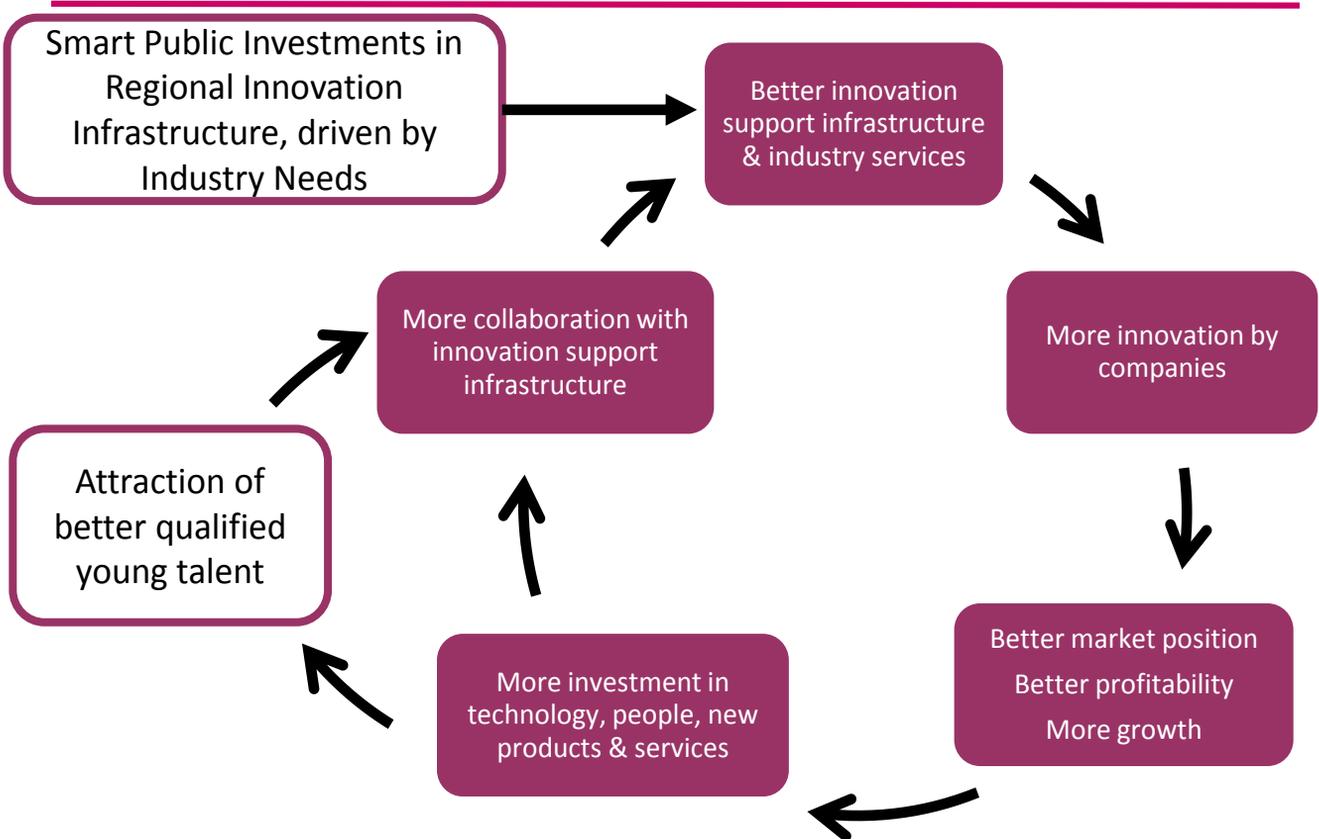

To enable Textile & Clothing SME's to invest more in innovation, to become more competitive and create high-value added jobs we need:

- More and stronger textile innovation clusters across Europe
- More investment in open textile technology infrastructure (technology centres, pilot plants, design and maker labs)
- More innovation business support services (coaching, technology scouting, financing, IPR, business start-up & incubation)
- Better exploitation of Smart Specialisation policies and related structural funds

Regional competences and infrastructures are the key to SME innovation in the T/C sector. Therefore EURATEX and the Textile ETP have launched RegioTex.

OBJECTIVE:

Creating a Virtuous Innovation Circle in Every Textile Region in Europe

About our methodology

Thematic Areas

The following are current Thematic Areas, already proposed by different regional partnerships.

The first 5 were developed under 2014's **Vanguard Initiative** and are now part of the Smart Specialisation Platform for Industrial Modernisation.

Regions interested in joining any of these partnerships should directly contact the representative of the Thematic Area's leading region.
