General Information

Short summary

With full private capital and an experience of over 25 years, TANCRAD's main object of activity is the repair and maintenance of roads and airports. The company also carries out civil and industrial construction works, produces asphalt mixtures for its own works and steel repairs. The company is looking for latest generation production equipment and technologies, raw materials and means of transport.

Full description

Fully privately owned and with over 25 years of experience, TANCRAD is a successful and thriving construction company, mainly engaged in:

- construction, rehabilitation and maintenance of highways, runways, bridges, roads. The range of services includes both infrastructure works, as well as road and bridge maintenance works;
- civil and industrial construction works: construction of office buildings, rehabilitation of schools, construction and rehabilitation of waste water treatment plants and waste water networks, water tanks and water supply systems, iron and steel repairs.

The company also offers services in the following areas:

- installation and sewerage works: specialists of the company offer optimal solutions in the field of sewerage and in the field of repair and rehabilitation of canals in conventional open excavations. Services include all ancillary activities

to be carried out in addition to pipe assembly, such as earthworks and trenching, earth retention works, and backfilling and sealing of excavated areas.

- protective structures: protecting people and the environment also requires the right buildings and structures. The company build the structures needed to protect people and their property. In the field of protective structures, the company offer optimal solutions with the construction of earth retention structures and railings.
- replacement and/or rehabilitation of utility network infrastructures: cleaning and unclogging of channels, mechanical cleaning of sewer networks, vacuum cleaning of vasesines.
- safe exposure of water, gas, electrical and telecommunications networks.
- manufacture of concrete, mortar;
- manufacture of asphalt mixtures;
- manufacturing prefabricated concrete;
- fabrication of metallic structures;
- sorting and crushing ballast and quarry aggregates;
- topo activities.

Advantages and innovations

The company uses modern, high-performance technologies, which allow the realization of quality and sustainable works over time, according to European standards, with minimal impact on the environment. Continuously evolving through self-improvement and staff involvement, through investments in equipment and technology and through success-oriented management, the company has become capable of carrying out a wide range of diverse works, both in the field of road repairs and maintenance and in the of civil constructions and land improvement works at the highest quality standards, gaining over the years the reputation of being a professional company and a reliable partner.

Technical specification or expertise sought

The Romanian company is looking for latest generation production equipment and technologies for roads construction, raw materials and means of transport, new or second hand.
