General Information

Short summary

Slovenian company, founded in 2002, is engaged in the production of e-bikes for personal use, transportation and bike sharing.

The company would like to find a partner to help solve the problem of batteries for their e-bikes. The batteries cause occasional (temporary/random) failure of the electric bikes due to (temporary) battery failure.

They are looking for Commercial agreement with technical assistance.

Full description

A Slovenian company is mainly engaged in the production of various electric bikes, from city e-bikes and mountain e-bikes to transport e-bikes (for postmen for example) and e-bikes for bike sharing services.

Company is looking for partners to enter into Commercial agreement with technical assistance. The desired outcome of this cooperation would be one in which the partner provides the Slovenian company help with the solution for preventing the (random/temporary) malfunction of batteries for e-bikes since they stop working from time to time. Potentially long-term commitments and practical aspects of the cooperation would be discussed upon initial meeting

and exchange of information.

Advantages and innovations

Technical specification or expertise sought

Type of Partner Sought: companies or research institutions that can offer help with the solution of preventing the malfunction of batteries for e-bikes while they are in operating mode.

The company would like to establish cooperation with any type of client that could help solving the mentioned problem.
